

Think*Energy*

Scan here to apply!

Energy literacy. Experiential learning. Entrepreneurship.

Investing in curious minds to build a robust energy economy.

Think*Energy* seeks students with a passion for clean energy. It connects them with energy professionals from industry, academia, startups, government, and nonprofits. The 12-month program not only includes a crash-course in all aspects of energy, but also gives students opportunities to apply this knowledge in the real world. This interdisciplinary immersion experience is unlike any other. The Think*Energy* program's six key elements are: weekly meetings with energy professionals (Think*Tanks*), entrepreneurship, research, prototyping, campus involvement and real-world experience.

FALL SEMESTER

- Weekly Think*Tanks* with energy professionals
- Introduction to the GLEI Advisory Board
- Conduct research on potential group prototyping projects
- Select groups and begin group prototyping projects
- Personal career coaching

SPRING SEMESTER

- Weekly Think*Tanks* with energy professionals
- Attend energy conference
- Clean energy start-up competitions
- Complete group prototyping project
- Ongoing career coaching

SUMMER

- Students gain real-world experience through an energy-related internship, co-op, or consulting project. External engagement is not limited to Cleveland, OH.
