**7.00**

Classic Italian eggplant with medium to large fruits

**Dancer**

**7.00**

Italian variety that is mild and nonbitter! Plants are strong and heigh-yielding.

**Golden Glory**

**3.00**

Spineless yellow zucchini with excellent yields. Disease resistance keeps the plant productive over a long season.

## Dunja

**\$3.00**

Early, powdery mildew resistant green zucchini. Open plants and short spines make for an easy harvest.

## Kale

**\$5.00**

“Starbor” variety Finely curled, dark blue-green leaves are uniform and resist yellowing with good flavoring.

## Collards

**\$5.00**

“Flash” variety. Slow to bolt with a high yield rate.

## Chard

**\$5.00**

“Bright Lights” variety. Mild flavor compared to ordinary chard. Beautifully colored stems ranging from gold, pink, orange, and white. Variety has a strong bolt resistance

## Asparagus

**10.00**

Perennial: Grown from our very own farm seeds! These are considered first year plants and will take 2-3 years before producing spears that should be harvested. Cold-hardy variety that grows well in Northeast Ohio

## Okra

**\$5.00**

Green okra, producing uniformed pods.

**NEW!**

**Okra**

**\$5.00**

Red okra, producing smaller pods than the green okra.

# Herbs

**Parsley**

**\$4.00**

“Giant of Italy” : Huge dark green leaves with great flavors. High-yielding.

**Cilantro**

**\$6.00**

“Cruiser”: Tidy, upright plant habit and excellent bolt resistance. Large leaves and sturdy stems with great flavor!

## Dill

**\$4.00**

“Thalia”: Uniform habit and blue-green foliage. Fast growing, delicious in sauces, marinades, and salads

## Chamomile

**\$6.00.**

Roman chamomile: Low growing, spreading plant with creeping rhizomes. Use for teas and medicines.

## Basil

**\$4.00**

“Genovese”: Tall and relatively slow to bolt with large dark green leaves. Considered a classic variety with intense basil flavor.

## Thai Basil

**\$4.00**

“Sweet Thai”: Long leaves have a spicy, anise/clove flavor. Excellent garnish for sweet dishes.

## Chives

**\$3.00**

“Dolores”: Highly consistent upright habit with fine dark green leaves.

## Mountain Mint

**\$4.00**

Used in potpourri, incense and as an ingredient in tea and natural insect repellent formulas. A native plant with white flowers to attract pollinators and beneficial insects to your garden!

## Mint

**\$4.00**

“Munstead”: Strain of English lavender with compact, bushy habit. Range of bloom colors from pale blue to dark violet. Perennial that usually flowers in the second year

**NEW!**

## Lemongrass

\$5.00

Perennial when properly mulched in colder climates. Stalks can be harvest to be used in soups and curries. Greens can be harvested and dried for teas

# Fruit

## Groundcherry

\$5.00

“Goldie”: This old-fashioned tomato family member bears sweet golden berries inside papery husks. The flavor is quite sweet. Plants are profusely branching, prolific, and drop ripe fruits. Fruits can be eaten raw, dried like raisins, frozen, canned, or made into preserves, cooked pies, and desserts.

## Strawberry

\$5.00

Winter hardy perennial

## Grapes

**\$15.00**

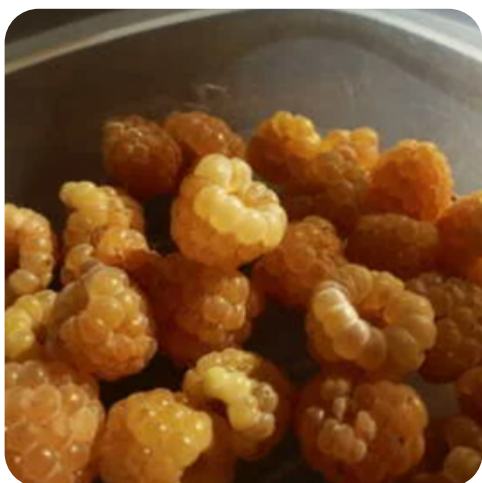

Concord: Seeded grape. With a shorter shelf life these grapes are great for snacking on fresh or used in jams and preserves.

## Black Currant

**\$15.00**

Fruit bearing in the early summer, these currants are bitter and best used in jams and preserves.

## Raspberry

**\$15.00**

“Anne”: Everbearing sweet flavorful pale yellow raspberry ripens in the fall. Everbearing raspberries bear on first-year canes (primocanes) and are particularly desirable for northern growers because they can die (or be cut) to the ground and still produce a sizable crop the following year.

## Raspberry

**\$15.00**

“Latham”: Large bright red 1" fruit is roundish, firm, a little crumbly and sweet. Ripens over an extended season. Summer-bearing raspberries bear on second-year canes (floricanes). Midseason berries ripen around late July in central Maine. Widely adaptable and very winter hardy.

## Blackberry

**\$20.00**

“Nelson”: Tall sturdy upright inch-thick canes can be grown on posts but also do well free standing. Fruit is moderately large and quite juicy with true blackberry taste. Blackberries bear on second-year canes (floricanes).

## Chicago Hardy Fig

**\$7.00**

The cold-hardest fig available

**ALL  
NEW!**

# Native Plants

## Butterfly Weed

**\$5.00**

A perennial, meaning it will come back each year, this native milkweed has beautiful, orange flowers that will attract the monarch butterflies that depend on it as a source of nectar and an essential food source for monarch caterpillars. Blooms early through late summer. May not bloom until next year.

## Cardinal Flower

**\$5.00**

A perennial, meaning it will come back each year, it has red showy flowers that are pollinated by hummingbirds! Needs consistently moist to wet soils to thrive. Blooms late summer to early fall. May not bloom until next year.

## Common Milkweed

**\$5.00**

A host plant for the monarch butterfly. This plant produces large pink clusters of flowers that provide nectar to an array of pollinators. The leaves are essential food for monarch caterpillars. Perennial. May not bloom until next year.

## Gray Headed Coneflower

**\$5.00**

A perennial that grows 3-5 feet tall, with beautiful yellow flowers. Blooms through the summer. May not bloom until next year.

## Lanceleaf Coriopsis

**\$5.00**

Perennial, grows in small clumps, 1-2 feet tall. Beautiful yellow flowers attract pollinators of all kinds. Blooms late spring to mid summer. May not bloom until next year.

## New England Aster

**\$5.00**

A tall 3-5 foot perennial with purple daisy-like flowers. Blooms late summer into fall providing nectar for pollinators late into the season. Perennial. May not bloom until next year.

## Passionflower

**\$5.00**

A perennial vine, so provide something for it to climb and be prepared to do some pruning and training work to keep this plant where you want it. Has very beautiful, unique purple flowers that produce an edible, if seedy fruit. Attractive to butterflies. May not bloom until next year.

## Purple Coneflower

**\$5.00**

A popular perennial 2-4 feet tall. Long lasting flowers have a large center cone surrounded by pinkish purple petals. Loved by bees, and seeds provide food for goldfinches. May not bloom until next year.

## Red Columbine

**\$5.00**

Delicate red flowers with yellow accents rise on wiry stems above equally delicate foliage. An early bloomer that will provide nectar to hummingbirds and bees in the early season. Prefers partial shade. Blooms early spring to early summer. Spreads easily by seed. May not bloom until next year.

## Swamp Milkweed

**\$5.00**

A host plant for monarch butterflies, this 3-4 foot tall perennial has clusters of pink fragrant flowers that will attract an array of pollinators. Blooms mid summer to early fall. Prefers moist soil, but is surprisingly adaptable. Perennial. May not bloom until next year.

## Yarrow

**\$5.00**

Feathery foliage with a cluster of small white flowers above. Grows 1-3 feet tall. Perennial. May not bloom until next year.

## Black-eyed Susan

**\$5.00**

Easy to grow, deer resistant and long blooming. Biennial, or lasting two years, though they may self seed, black-eyed susan are a beautiful addition to the garden.

## Red Osier Dogwood

**\$5.00**

A deciduous shrub with vibrant red stems. Can grow 6-9 feet tall. Has green leaves in the summer and small white flowers. Prized more for the red twigs visible after leaf drop through the winter.

## Orange-twig Dogwood

**\$5.00**

Not a straight native, but a cultivar of Red Osier Dogwood. Sports bright orange stems after leaf drop in the winter, which provides some much needed color and winter interest. A deciduous shrub that can grow 6-9 feet tall.

## Yellow-twig Dogwood

**\$5.00**

Not a straight native, but a cultivar of Red Osier Dogwood. Sports bright yellow stems after leaf drop in the winter, which provides some much needed color and winter interest. A deciduous shrub that can grow 6-9 feet tall.
